

The Auditor Tool New Functionality in the Healthix Portal *August 1, 2016*

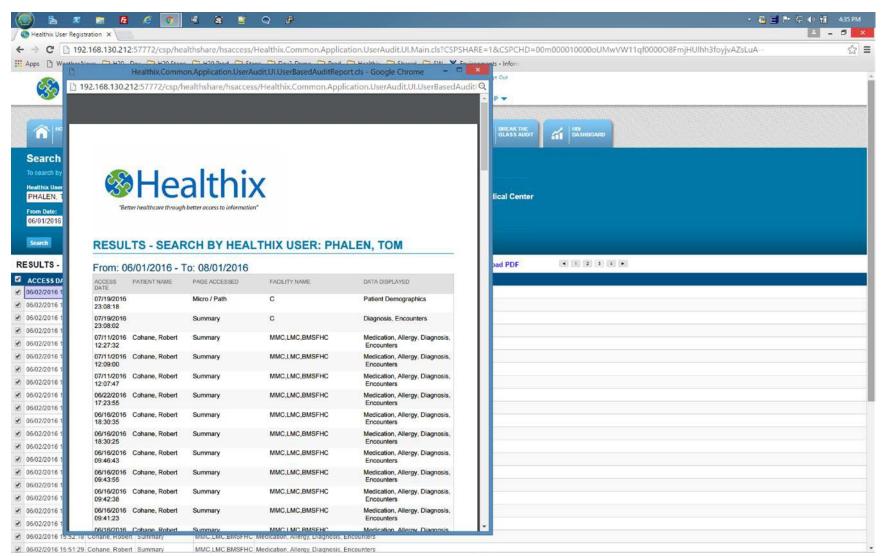

The tool allows Auditors at sites to review portal access by user or by patient.

If I enter a user I can view what patient and what data the user viewed in the portal for a specific date range.

A user can select certain rows or all rows and build a PDF report.

You can also select a patient use the Medical Record Number (MRN) and see who has accessed that patient.
