

Overview 2017

Updated: June 15, 2017

Largest Public HIE in the Nation

**More than
16,000,000
patients**

Healthix contains data from healthcare organizations throughout New York City and Long Island. Healthix uses sophisticated software to reconcile data of over 58 million provider Medical Record Numbers (MRNs) to create composite profiles of over 16 million patients.

About Us

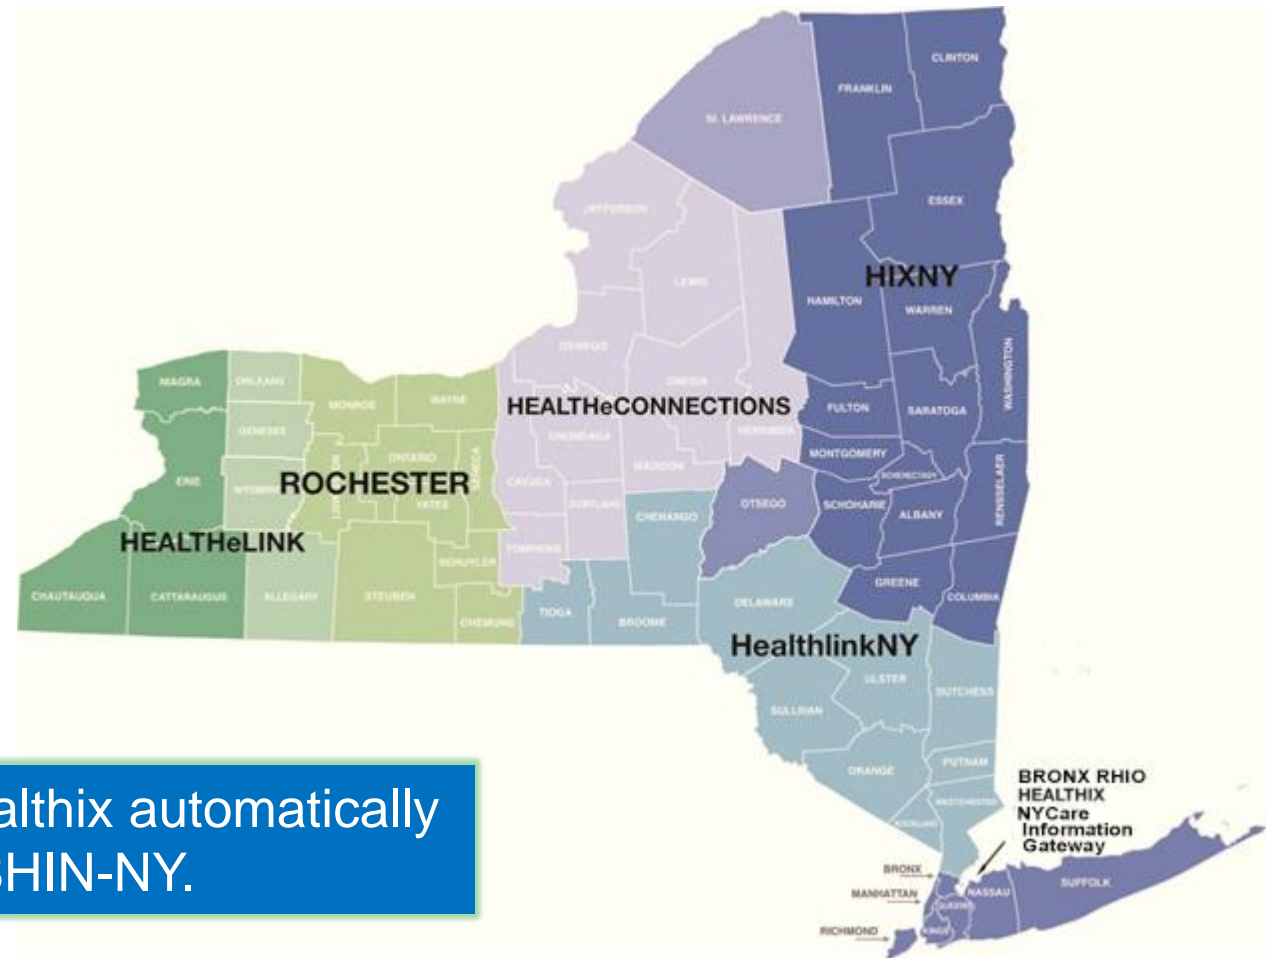

Hundreds of healthcare organizations at more than 1,500 facilities across New York City and Long Island participate in Healthix.

Healthix Monthly Statistics (June 2017)

- 46 Million inbound clinical messages
- 485,000 Real-time clinical alerts
- 104,000 Patient Summary Documents Shared (CCDs)

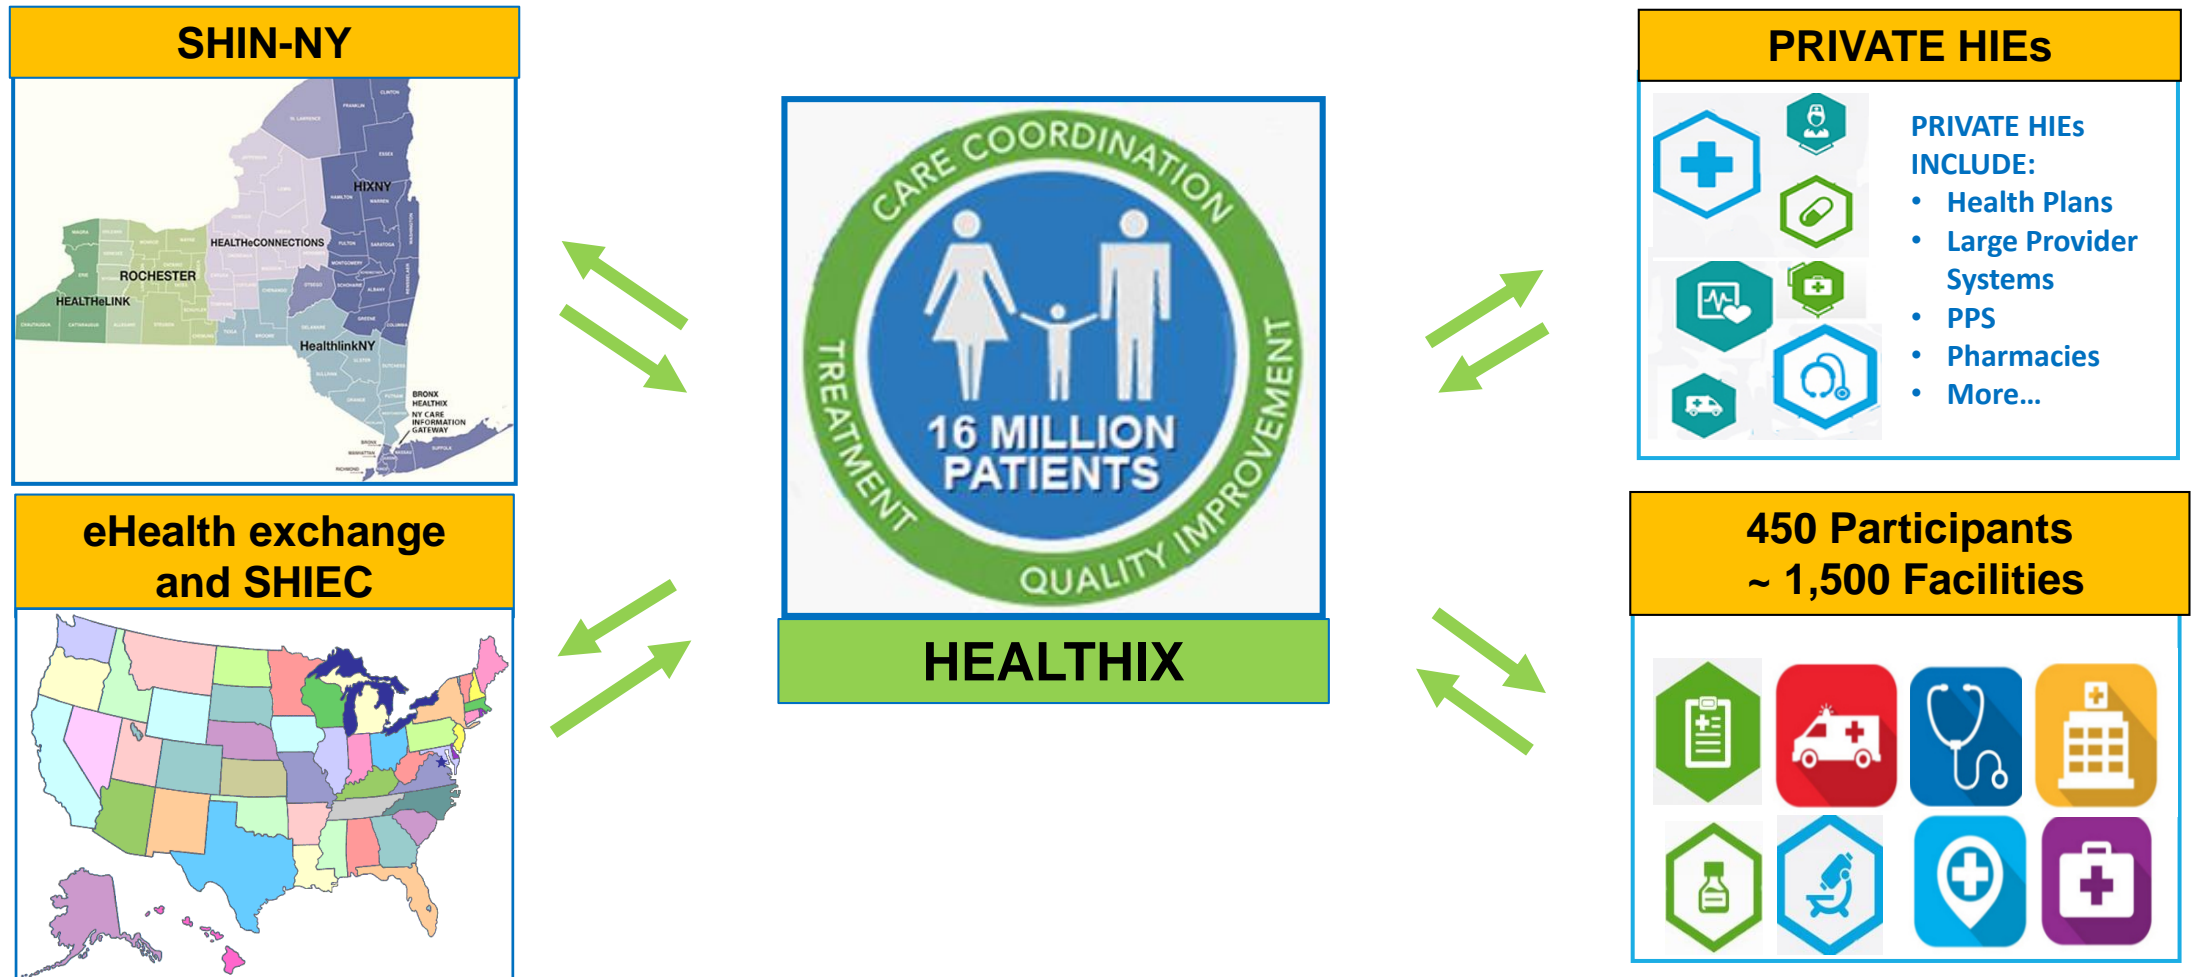

Healthix and the SHIN-NY

The SHIN-NY is composed of 8 HIEs or Qualified Entities (QEs). The NYS DOH establishes common services, privacy and security policies, and technical standards for interoperability.

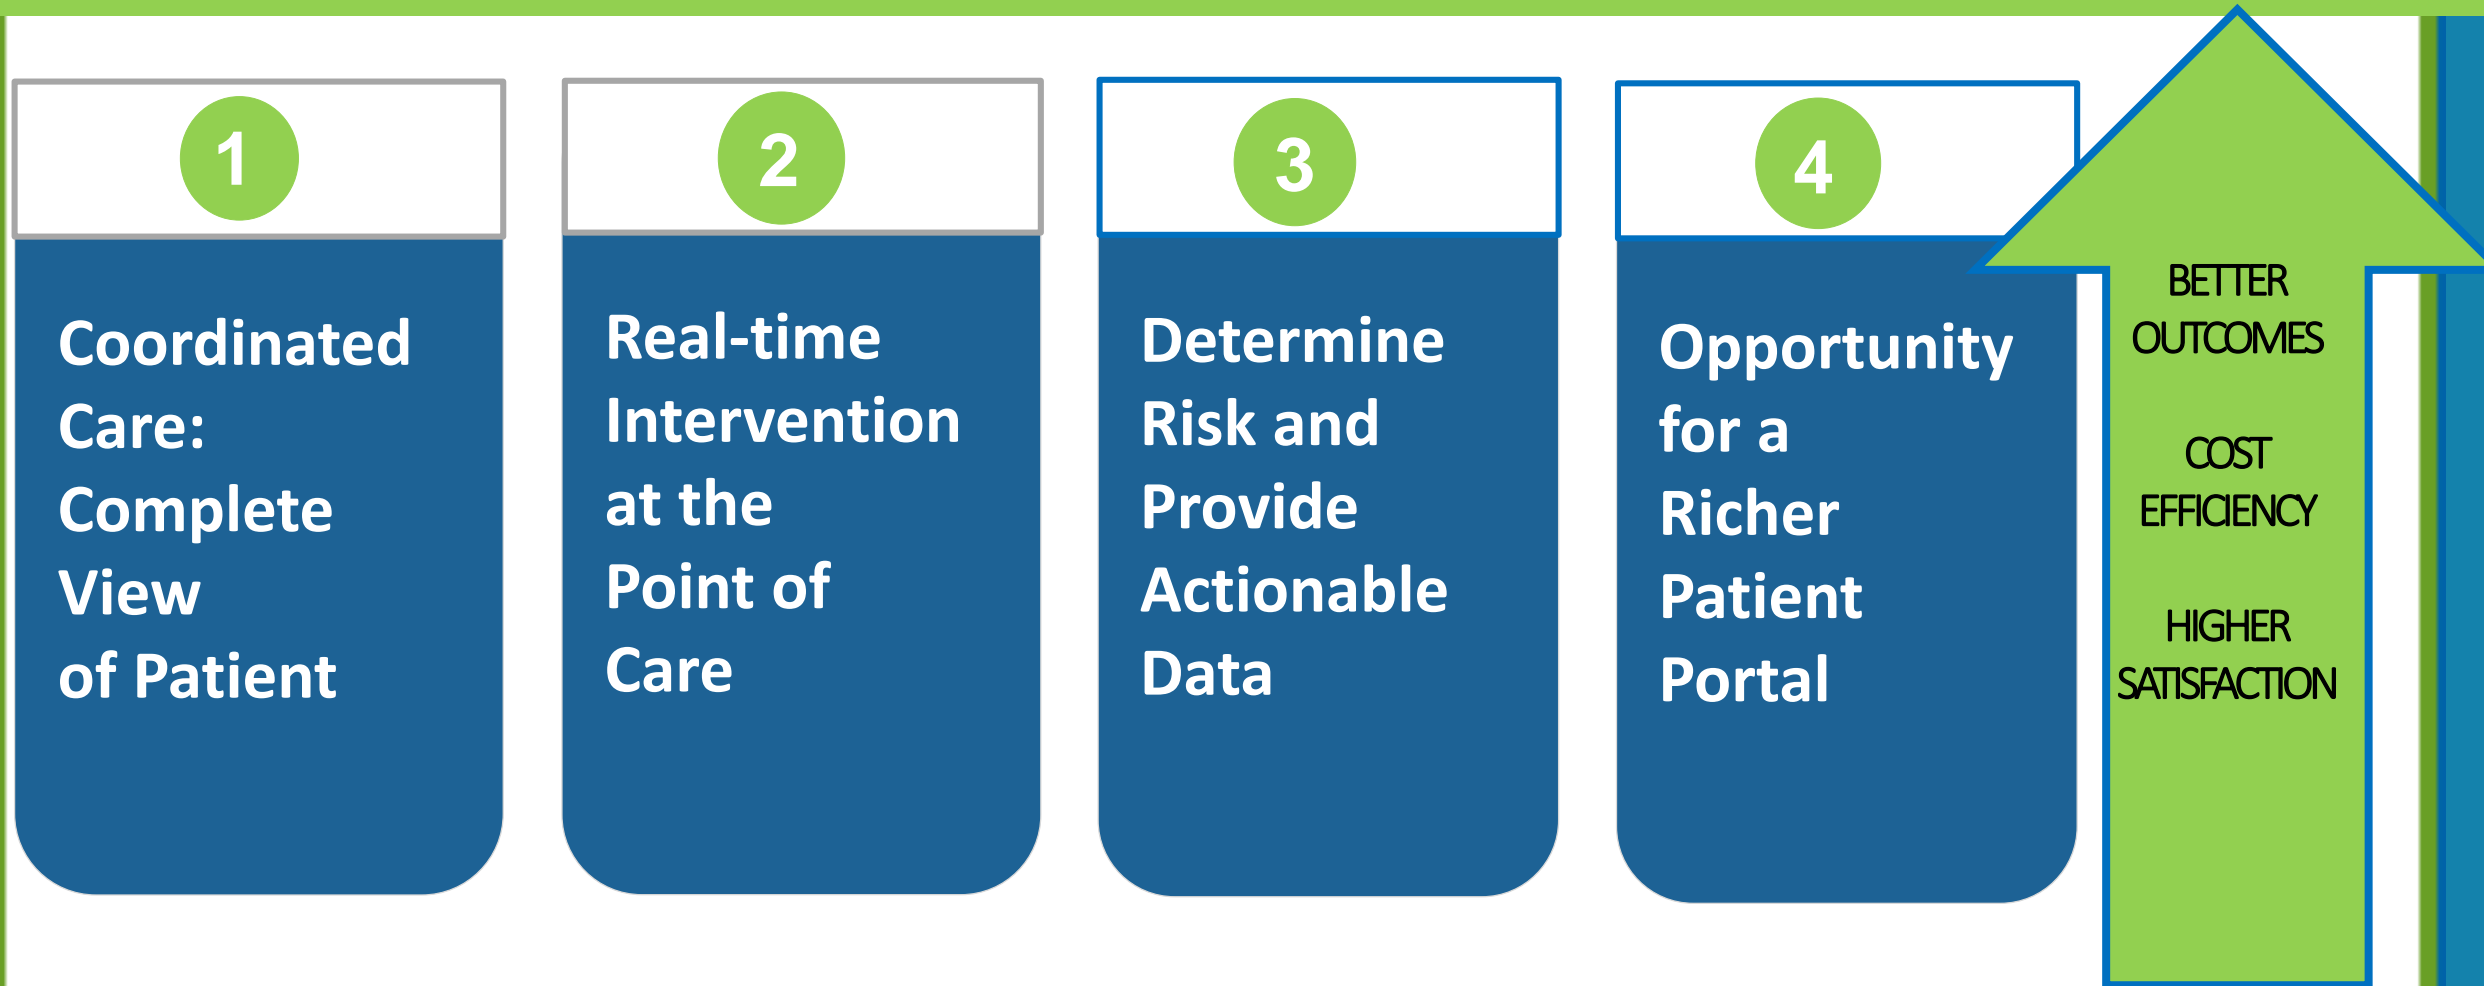

When a user queries for patient data, Healthix automatically returns data from both Healthix and the SHIN-NY.

Role of Healthix in Exchanging Information

Healthix: Providing Solutions, Adding Value

Sources of Data

The breadth of data in Healthix is expanding in the number and type of contributors

							In development	
Hospitals	Independent Physician Practices of All sizes	Long-term Care, Nursing Facilities	Behavioral Health Facilities	Federally Qualified Health Centers (FQHCs)	Community Based Organizations	Home Care
