Healthix

The Latest Improvements to the Healthix Portal
March 1, 2016

We have been hard at work improving the functionality of the Healthix Portal. Here are just a few things we want to bring to your attention:

- **DATE OF BIRTH SEARCH**: Now the date of birth search is in the American format you are accustomed to MM/DD/YYYY

- **SENDING MESSAGES WITH ATTACHMENT:** When you send a message from the Healthix Clinical Message Center (CMC) you can now attach a document (a CCD from Healthix) by clicking on Patient which will launch patient search. Once you arrive at the Patient summary screen you will see the CCD link –Clicking on link will attach the CCD to your email.

Now, you can also attach a PDF, word or other document from your computer. Using the link "Attachment" found on the bottom of your email shown here. All attachments can be sent to any participant in Healthix via the CMC or can be sent using direct messaging to anyone with a direct messaging account.

- **RECENT SEARCHES:** Now there is a list of all your recent searches. So you can easily check on to the information you've recently referenced.

- **SMALL ENHANCEMENTS:** The screen size now adjusts to the users view and eliminates the scroll bars, making it easier to navigate around the portal effortlessly.

We will keep you informed of all Healthix upgrades and improvements. We are committed to serving you so that you can better serve your patients.
